## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 22 of U.S. Patent No. 6,668,776. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the instant invention is essentially included in claim 22 of U.S. Patent No. 6,668,776. Claim 22 also contains more specific limitations. The sole limitation included in claim 1 of this application not included in claim 22 of the patent is the spring contact point being the top edge of said pin housing, such is an obvious choice to one of ordinary skill in the art since the only logical contact point for the spring seat with the pin housing is on the topmost portion.

### *Allowable Subject Matter*

3. Claim 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 4-5 are allowed.

***Conclusion***

5. The IDS (PTO-1449) filed on 9 December 2003 has been considered. An initialized copy is attached hereto.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of 2 patents.

- Church et al. (U.S. Patent 6,321,704) disclose a valve deactivator assembly with a pin latching mechanism and lost motion compression spring.

- Groh et al. (U.S. Patent 6,257,185) disclose a switchable cam follower with a tappet pushrod and torsion spring.
